- (1) These costs were not further analyzed because the departments / activities relate solely to ComEd's distribution service.
- (2) Other includes costs of the Project and Support, Claims, and the Credit Disconnect departments.
- (3) There were no costs related to Electric Supplier Services in 2013 because projects from previous years had already been completed.
- (4) The Customer Relations department was included in the (Other) category in 2010. Because of increased and better reporting in 2013, costs were able to be further analyzed in 2013.
- (5) Indirect costs are costs for: pensions, health care, incentives, payroll taxes, office facilities, human resources function, payroll department, computer equipment and software, accounting, legal, procurement, forms and other administrative and general expenses

FMS	98.8%	1.2%
Meter Reading	100.0%	0.0%
CIMS Users	73.1%	26.9%
SIR Work	82.7%	17.3%
AMI		
IT Licensing	88.2%	11.8%
LCS	99.0%	1.0%

All meter reading work is delivery related and contributes to the Customer operations general allocation amount

100% of AMI is Metering Services

Based on interviews with LCS reps in which they stated they rarely, if ever, talk about ComEd supply with customers

**Notes**

EDI costs are included in FERC 903, Subaccount 528000, Project ITC3015, Department 311 (IT Cust Service Regulatory - CED). They have been categorized as IT costs.

## 2009 Bill Allocation - Ratio of Supply lines vs Total lines on a bill

Docket No. 10-0467

Calculating or explaining a bill consists of calculating and providing several line items to the bill print vendor

**Note:** Upon Review of 20 bills 3 lines on the average bill are dedicated to supply charges/details.

	1% Switching	10% Switching	100% Switching	
Supply line items on typical residential bill	3	2.8	1	At least one portion of the bill will always be supply and require some attention or explanation
Electricity Supply Charge				
Transmission Services Charge				
Purchased Electricity Adjustment				
Delivery line items on a typical residential bill	3	3	3	
Customer Charge				
Standard Metering Charge				
Distribution Facilities Charge				
Taxes and Other on a typical bill	6	6	6	
Smart Meter Program

## 2009 Bill Calculation Allocator - Ratio of Supply print area vs Total print area on a bill

Bill printing and mailing is governed by the area printed on each bill (ink, paper, etc.)

Method 1: Just measure sections of the bill that have a delivery component and subtract from overall area of page

	Width (mm)	Height (mm)	Area (mm2)
Overall area of front page of bill:	215	280	60,200
Meter boxes left off because they are meter based activities and not yet assigned to a total bill			
Electricity Supply Section of bill:	155	22	3,410
% of Supply section dedicated to supply charges			100%
Bill Summary section at top of bill:	73	17	1,241
% of Bill Summary section dedicated to supply charges			75%
Total Current Charges Line item:	152	10	1,520
% of total current charges dedicated to supply charges:			75%
Payment deducted amount at bott	18	10	180
% of deducted amount section dedicated to supply charges			75%
Method 1 Total			91%

Total Percentage of bill dedicated to Delivery Charges for this stud	82.7%
--	-------

Method 2 will be used because it presents a more accurate measurement of the bill ink area

## Docket No. 10-0467

Bill printing and mailing is governed by the area printed on each bill (ink, paper, etc.)

Method 2: Measure all sections of the bill (in rectangles) total up the area and determine which is supply and which is distribut

	<u>Width (mm)</u>	<u>Height (mm)</u>	<u>Area (mm2)</u>	<u>% Distr</u>	<u>Distr Area</u>

**Notes**

(1) **Bill Calculation Allocation** - Transaction related to a Balance, Budget Billing, Payments, Voice Response Unit (VRU), or Summary Billing

(2) **Revenue Allocation** - Transaction related to Payment Plans, Service Disconnection, Actual Payments, ComEd Care Program, Application Verification, W9 forms, or Electronic Fund Transfers (EFT)

(3) **Distribution Allocation** - Transactions related to Moving, Outages, Meter Reading, Vegetation Management (trees), Wiring Issues, Street Lights, Duplicate Documentation, or ComEd Sponsored Programs

(4) **Call Center Allocation** - Transactions specifically related to unidentified calls or web

 Credit can include both Distribution & Supply  
 The change in methodology from 2010 to 2013 was due to more robust reporting available in 2013

## 2009 Revenue Protection Spend vs. Overall Budget

Docket No. 10-0467

Rev Pro activities:

- 1) Consumption on inactive meters - driven by usage
- 2) Stuck meters - driven by usage (or lack thereof)
- 3) Commercial compliance investigations - meter audits - to ensure usage is measured
- 4) Theft - consumption on cut meters or other investigations regarding tampering, illegal taps etc. - usage
- 5) Rev Pro billers backbill, and/or connect customers to the extent field work or other backoffice investigations yield appropriate information. Backoffice also supports tech work in the field by issuing orders

Total	\$1,894,385,686	\$3,040,694,447
	38.4%	61.6%

The residential demand response cost of \$1,048,130 for operating the Nature First\Central Air Conditioning Cycling Program included cost

- \* Operating and maintaining the direct load control switches for the program
  - Includes a field work force of technicians to maintain the switch
  - Includes a call center to take technical calls about the program from customers
  - Includes information technology support for the program
- \* Operating the paging network to communicate with the switches
- \* Includes quality control audits to insure equipment is installed properly

The commercial and industrial (C&I) demand response cost of \$1,218,809 for operating the Capacity based Load Response (CLR) Program and the Voluntary Load Response (VLR) Program included costs for:

- \* Promoting the C&I demand response programs to customers
- \* Providing administrative and information technology support for the C&I programs
- \* Supporting the Energy In-sights Program that helps provide interval metering data via a website to customers on the C&I demand response programs.
- \* Using Energy Insights perform measurement and verification (M&V) of curtailment events
- \* Systems to notify C&I customers of demand response events

## Notes

- (1) The residential demand response cost of \$2,069,679 for operating the Nature First\Central Air Conditioning Cycling Program included cost for:
- \* Operating and maintaining the direct load control switches for the program
    - Includes a field work force of technicians to maintain the switch
    - Includes a call center to take technical calls about the program from customers
    - Includes information technology support for the program
  - \* Operating the paging network to communicate with the switches
  - \* Includes quality control audits to insure equipment is installed properly
- From the \$2,609,679, \$365,000 is subtracted for PJM AC Cycling payments, resulting in
- (2) The commercial and industrial (C&I) demand response cost of \$1,258,792 for operating the Capacity based Load Response (CLR) Program and the Voluntary Load Response (VLR)
- \* Promoting the C&I demand response programs to customers
  - \* Providing administrative and information technology support for the C&I programs
  - \* Supporting the Energy In-sights Program that helps provide interval metering data via a website to customers on the C&I demand response programs.
  - \* Using Energy Insights perform measurement and verification (M&V) of curtailment events
  - \* Systems to notify C&I customers of demand response events
